SUMMARY

Full Stack Engineer passionate about building AI-powered products from idea to production. Experienced in developing developer tools, production web applications, and intelligent systems using React, Next.js, TypeScript, Node.js, and modern AI APIs. Strong focus on shipping products, contributing to open source, and solving real-world problems.

PROJECTS

Reconalyst | *Next.js, TypeScript, Node.js, Vertex AI, Firecrawl*

[Live](#)

- Built and deployed an AI-powered company intelligence platform that generates structured reports from public web data.
- Designed a multi-stage pipeline combining Firecrawl, web research, and Vertex AI to analyze companies, competitors, customers, and market signals.
- Built the full-stack application with real-time report generation, caching, and interactive report views.

RepTran | *Flutter, Node.js, PostgreSQL, AWS*

[Play Store](#)

- Built and launched a behavior-driven fitness application focused on improving workout consistency.
- Developed adaptive plans, streak tracking, analytics, and backend APIs using Node.js and PostgreSQL, deployed on AWS EC2.
- Published the application on Google Play and continue iterating based on user feedback.

Attnsn | *Next.js, TypeScript, Node.js, Vertex AI, Firecrawl*

[Live](#)

- Built an AI news intelligence platform that aggregates updates from multiple sources into a curated daily briefing for AI builders.
- Designed a pipeline for ingestion, event clustering, ranking, and AI-generated summaries to reduce information overload.
- Built an editorial web experience focused on high-signal updates rather than real-time news feeds.

OPEN SOURCE

n8n | *TypeScript, Node.js*

[Repository](#)

- Contributed to **n8n**, a leading open-source workflow automation platform with 190k+ GitHub stars.
- Merged 2 production pull requests after understanding the existing architecture and implementing TypeScript and React improvements.
